

EA-RS Automatic Bollard

Maintenance Details

Annual Maintenance Contract – starting at £599.00 per set of Automatic Bollards per year

A Maintenance Contract will generally include 2x Annual Maintenance Visits every 6 months. (We may recommend more visits per year depending on the traffic flow through the Bollards).

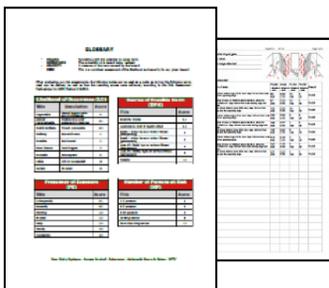

Each visit consists of the following on a set of Automatic Bollards:

- A detailed Maintenance Report - all necessary checks to each Bollard and control equipment
- The complete removal & the re-installation of each bollard to inspect foundation boxes. (Redirection of traffic will be required on day of visit)
- Risk Assessment Review

All of the above is a preventative measure and required to make sure that the Automatic Bollards complies with latest HSE recommendations. Any adjustments and consumables such as batteries in wireless safety devices are included. If any upgrades, major repairs or replacements are required we report back with appropriate recommendations. Contract doesn't cover water damages, faults and damages caused by vandalism.

Once the Maintenance visit has been completed a full report will be sent to you for your reference and if required a quote of any further work found during the visit.

Breakdown of Costs	Total Cost
Up to 2x Automatic Bollards	£599
Additional Single Bollard	£310

Please Note: This is our standard and most popular Maintenance Contract that we provide. More comprehensive Plans are available.

All other works will be charged at £98.00 for the first hour and then £78.00 for every hour or part thereof. Parts used will be charged at our Standard List Price.
