

EA-RS Biometric Fingerprint Reader

EA-RS

The fingerprint readers incorporate a unique "Multi Spectral Imaging Sensor" instead of the standard optical sensor, overcoming problems with dry, cold or greasy fingers. The Ultimate reader is available in an indoor or outdoor model. The Micro reader incorporates the same advanced features but only half the size – for internal use only. Both readers seamlessly integrate into other access control systems (such as Paxton Net2).

Overview

The iEvo reader provides you with the following benefits:

- Minimalistic in design
