# BOWLING PARK PRIMARY SCHOOL

### CLIENT

Industrial Services Group  
c/o Bradford Council

### COMPANY SECTOR

Education

### SERVICES PROVIDED

External Doors  
Improved Thermal  
Performance  
Escape Equipment  
Locking Systems

### PRODUCT SUPPLIER

UKFSD

### CLIENT BRIEF

Bradford Council continually looks to upgrade windows and doors to improve security and thermal efficiency within the local area. Upon evaluation, it became evident that Bowling Park Primary School's security doors were beyond their economic life and had a plethora of issues, such as dropped hinges, general wear and tear, and issues with closing, creating an increased risk of security breaches or injury to daily users. UK Fire & Security Doors (UKFSD) were appointed the project through a recommendation from ISG, with who we have previously worked alongside.

### PROJECT SOLUTION

UKFSD worked alongside ISG and Bradford Council to survey the premises and build a specification for the job in line with the requirements of the site manager. By carrying out thorough site surveys and consultation meetings on site, we were able to plan and produce a full new set of external doors across the entire school which vastly improved security, whilst also improving thermal performance, and bringing the doors up to modern standards with escape equipment and locking systems.

### PROJECT RESULT

All works were carried out with great care and completed on time, and the client was extremely happy with the result.

"Our in-house suppliers and installers fitted the new UPVC windows and ISG appointed UKFSD to review the doors. I cannot fault the work carried out by your fitters, they were very accommodating and helpful throughout the project. They were not only fast but very neat with finishing off. The fitters also worked in the extreme heat throughout and I would definitely recommend them to others."
