CLIENT BRIEF

PCB Technical Solutions requested the installation of a suitable fire suppression system for the Main Intake Room at a Distribution/Logistics Centre serving a major clothing retailer in Milton Keynes.

PROJECT SOLUTION

Surefire, part of EA-RS, provided a comprehensive solution including the design, supply, installation, and commissioning of an Inert Gaseous fire suppression system. Additionally, a dedicated combined Pressure Relief Ventilation and Extract system was provided to safeguard the Main Intake Room.

PROJECT RESULT

The mechanical and electrical installation was executed promptly, meeting the satisfaction of PCB Technical Solutions LTD. Surefire conducted thorough on-site training with the facilities team, ensuring a seamless transition to the new system.

"Surefire delivered the project to the expectations of the client in a timely manner. The communication throughout the project was excellent, and the engineering team conducted themselves in a professional manner and were clean and tidy throughout the installation. We received training on the new system at the end of the project, which was clear and concise."
