

CPD seminar

Connecting the built environment

This presentation aims to understand the current environment heavily influenced by consumer demand, industry initiatives, green agendas and advances in technology.

The seminar asks three fundamental questions:

- What are the drivers?
- What is industry doing?
- How are we responding, reacting and adapting?

Case studies then provide further context to the subject matter.

By the end of the seminar, participants will be better placed to understand what is influencing the construction industry in terms of technological advances which may enable our pathway from connected products to connected communities and connected cities:

- The landscape
- Industry drivers
- Industry response
- Industry themes: IoT / digital twins / golden thread

.....

SEMINAR CONTENT

- The influencing landscape
 - The world is changing / macro drivers / consumer drivers
- Industry response
 - Energy efficiency initiatives / home and buildings in general
 - Building Information Modelling / National Digital Twin
- Connected buildings
 - IoT themes
 - Golden thread
 - Smart cities
- Summary
- Notable standards, regulations, papers
- Case studies
- Further learning
- Q&A

.....

TARGET AUDIENCE

- This seminar is ideal for:
- Architects
 - Designers
 - Product specifiers
 - Facilities managers
 - Electrical consulting engineers
 - Electrical contractors
 - Clients
 - Students

.....

BOOKING DETAILS

Complete the booking form online at www.legrand.co.uk/CPD

.....

DURATION

1 hour (to include a Q&A session)

.....

LOCATION

Virtual via Microsoft Teams or face-to-face at your offices
